

iVeren

from Tender to turnover

INDUSTRIAL ENGINEERING • PROCESS EXCELLENCE • SERVICE

COMPLEX REQUIREMENTS. PRACTICAL SOLUTIONS.

We make complex industrial requirements manageable for small and medium-sized businesses.

COMPANY BROCHURE • 2026

Experience that makes complex requirements manageable.

We combine industrial experience with technical expertise and a clear focus on what matters. Our goal: to make complex requirements practical, structured and commercially viable.

YANNICK LUFT

Co-Founder Technical Services

Experience in industrial plant construction, construction supervision, quality assurance and technical acceptance. Focus: implementing quality requirements, managing interfaces and documentation, and establishing reliable workflows.

Quality Assurance & Acceptance
Standards, inspections and audits

Construction & Implementation
Support from installation to commissioning

Interfaces & Documentation
Clear processes and reliable workflows

MARKUS WIECLAW

Co-Founder Process Engineering

Mechanical engineer with over 15 years of international experience in wind energy, oil & gas and industrial engineering. Focus: service engineering, technical project leadership, processes and collaboration with OEMs.

Service Engineering
From commissioning to aftersales

Process Development
Efficient and robust processes

Project Management
Connecting interfaces and ensuring delivery

Industry experience

We know the standards and expectations of global industrial companies.

End-to-end perspective

From the tender stage to aftersales service.

Pragmatic solutions

Practical, efficient solutions tailored to your business.

Reliable partnership

Hands-on support from experienced engineers.

Two locations. One strong network.

Our network extends beyond our two locations, connecting Germany and Europe. We stay close to our customers, projects and partners — flexible, reliable and focused on solutions.

Two locations

Hamburg and Heidelberg — locally rooted, active across Germany and Europe.

Strong network

Close collaboration with customers and partners throughout Germany and Europe.

Always close to you

Short distances, fast responses and personal contacts.

2

Locations

Hamburg & Heidelberg

Germany & Europe

Strong connections across all regions

Flexible

Fast responses and personal contacts

Solution-oriented

Close to customers, projects and partners

Industry is becoming more complex.

More regulations. More interfaces. More documentation.

Rising requirements, growing connectivity and increasingly detailed evidence obligations make industrial projects more complex and demanding — particularly for SMEs.

More regulations

Requirements for products, processes and supporting evidence continue to rise.

EU Machinery Regulation (EU) 2023/1230

Generally applicable from January 2027.

ISO 12944

High standards for corrosion protection and coatings.

Eurocodes and related standards

Including welding and execution standards (EN 1090, ISO 3834).

More interfaces

Large corporations' structures often cannot be directly applied to small and medium-sized businesses.

Multiple hierarchy levels

Lengthy coordination and approval cycles.

Different departments

Engineering, procurement, quality, legal, HSE and more.

A challenge for SMEs

Corporate structures can slow efficient workflows and decisions.

More documentation

Environmental and occupational safety requirements, evidence obligations and traceability have greatly increased documentation workloads.

Environmental & occupational safety

Increasing requirements and supporting evidence.

Traceability

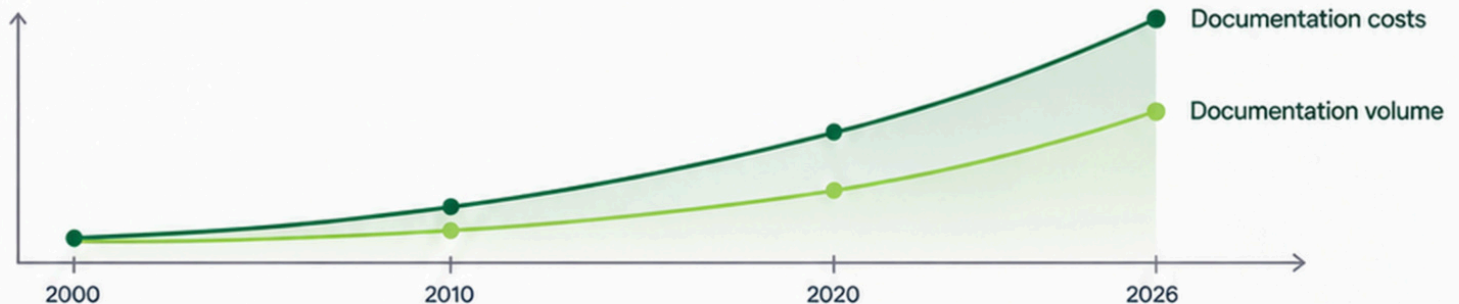

Complete documentation throughout the entire lifecycle.

Lessons from incidents

Past events and higher safety standards increase inspection and documentation workloads.

DOCUMENTATION TRENDS

Illustrative trend — not a historical data series.

7 %
of working time

in German SMEs is spent
on bureaucratic processes.

€61 billion
per year

Cost of bureaucratic processes
for German SMEs.

From idea to operation. Our 5-Phase Model.

iVeron supports the entire industrial project lifecycle — modular and tailored to our clients' needs. Each phase can be commissioned separately or as continuous support from idea to operation.

Concept

From the first idea to a sound foundation.

Definition

Clearly define requirements, specifications and interfaces.

Execution

Support efficient and reliable technical implementation.

Turnover

Ensure a safe and complete handover to operations.

Aftersales

Long-term support for reliable operation.

YOUR BENEFITS

Modular

Commission individual phases or end-to-end support.

Scalable

Flexible support tailored to your projects.

Practical

Experience from complex industrial projects.

Measurable results

Efficient processes, fewer risks and lasting success.

iVeron Requirements Navigator.

Understand regulations. Structure requirements. Implement with confidence.

The iVeron Requirements Navigator helps you quickly capture complex requirements from standards, regulations and customer specifications, structure them and turn them into clear, efficient and practical actions.

KEY FUNCTIONS

Centralise regulations

Bring relevant standards, legislation and customer requirements together in one place.

Structure requirements

Filter, classify and organise information clearly for your project.

Support implementation

Define concrete actions and track their status throughout the project.

Create transparency

A clear view of compliance, open issues and risks.

YOUR BENEFITS

Faster onboarding

Understand complex requirements in less time.

Greater assurance

Complete and traceable implementation of requirements.

Less effort

Efficient processes through structured information.

Better decisions

A sound basis for technical, commercial and organisational decisions.
